PRICING ANALYST

Working for a dynamic and growing energy company the Pricing Analyst role is an excellent opportunity for a strong analyst with an interest in the energy markets and renewable energy. Pricing Electricity Supply and Power Purchase Agreements you will be instrumental in driving the business forward and helping to deliver Conrad Energy's full-service provision to energy consumers and generators.

Applicants will need to hold a driving licence and have the ability to travel as our sites are across the UK.

About Conrad Energy Ltd

Conrad Energy is the power company of the future, supporting critical national infrastructure through delivering flexible generation when it is needed most in support of a low carbon power grid dominated by renewable energy. Our growing team also deliver optimal power solutions for corporate clients from a range of complementary technologies and apply strategies tailored to customer requirements.

Radically transforming the way the energy market works, Conrad Energy is the largest provider of flexible generation in the UK. We now have a combined installed capacity of 600MW across 45 sites with over 100 experts dedicated to supporting critical national infrastructure and the UK's energy transition to a low-carbon economy.

A full-service Independent Power Producer (IPP), Conrad Energy is focused on meeting the growing demand for balancing services in the UK electricity market through the development, construction and ownership of natural gas fired peaking engine plants and battery storage systems. The management team has vast experience in this field, and we have strong financial backing to grow a premier generation business.

We are based in Abingdon, Oxfordshire and our projects cover the UK.

Key responsibilities:

- Analysis of generation and consumption half hourly data, deploying analytical and pricing methodologies to ensure that prices offered are accurate and fully reflective of cost and risk
- Develop and maintain standard and bespoke pricing models for electricity consumers and generators
- Maintain a proactive approach to the forecasting and pricing processes for all elements that make up the final customer price, including distribution, transmission, metering and other industry charges.
- Work with the Operational and Trading teams to ensure that initial energy hedges are put in place and customer forecasts are acted upon
- Assist in the onboarding of customers and respond to all aspects of pricing queries from customers within the required time frame to ensure billing activity is not negatively affected

- Work with third party service providers, including Third Party Intermediaries, to ensure a seamless interaction between the company and the company's Customers and the service providers
- Undertake analysis of customer and portfolio profitability, identifying key opportunities to reduce cost and increase margin
- Work with Back Office colleagues prepare data and prices for use in the monthly customer and industry billing process
- Perform root cause analysis of data exceptions and liaison with key stakeholders to inhibit future recurrence

Ideal qualifications, skill sets and experience:

- Strong academic background with a numerate, technical or energy focused degree.
- Solid numerical ability and attention to detail and deadlines.
- Excellent communication skills and telephone manner and confident personality with the ability to work effectively with people from all parts of the organisation and external customers and service providers whilst challenging ideas where appropriate
- Good Microsoft Excel skills and a willingness to develop these further
- Experience with a scripting language (ideally Python)
- Experience building reports, dashboards and databases
- An interest of, or preferably working experience in, the UK energy markets.
- Eligibility to work in the UK is essential
